Strengths & Improvement Areas

Each Strength and Improvement Areas is rated on a 3 levels-scale, indicating the priority level or the level of criticality.

This indicator represents the level of importance of the issues the strength or the Improvement Area refers to. The higher the priority level, the more important the stakes (e.g. number of CSR criteria impacted) for the associated strength or improvement area. A Improvement Areas having a priority level of A should be addressed in priority.

Therefore, the priority level or level of criticality does not refer to a level of compliance or level of performance but provides an indicator of priority in

order to help build an action plan.
